

Siva Kowshik Sripathi Panditharadyula

Junior AI Engineer / AI Solutions Engineer

Melbourne, VIC, Australia | kowsik.king451@gmail.com | linkedin.com/in/siva-kowshik-sripathi-panditharadyula-241713150

CAREER OBJECTIVE

Masters in Business Information Systems (Software Development) graduate from Torrens University Australia and AI engineer in Melbourne building Azure AI solutions in Python: RAG with Azure AI Search and Azure OpenAI, agents with Microsoft Foundry, and Databricks / Delta Lake pipelines. I bring a software engineering foundation from Infosys, about four years as Business Manager at Grill'd and Mad Mex leading teams of 15+, and founder experience at Australian Vision AI. AZ-900, AI-900 and Databricks Fundamentals certified; AI-103 in progress. Seeking a junior AI engineer / AI solutions role or internship to build production AI agents and RAG solutions for real business problems, bringing leadership and problem-solving. Available immediately.

TECHNICAL KNOWLEDGE

- **Languages:** Python, SQL, REST APIs, PySpark
- **AI / ML:** RAG, agentic workflows, LLM integration, prompt engineering, LangChain / Semantic Kernel
- **Azure:** Azure OpenAI, Microsoft Foundry, Azure AI Search (vector / hybrid), Azure Functions, Cosmos DB, Blob Storage
- **Data:** Databricks Lakehouse, Delta Lake, ETL / ELT
- **Practices:** Production Python backends, microservices, workflow optimisation

EDUCATION

Masters, Business Information Systems (Software Development) Torrens University Australia	2020 – 2022
BE, Electrical, Electronics and Communications Engineering Sathyabama University	2012 – 2016

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- Microsoft Azure AI Fundamentals (AI-900)
- Databricks Fundamentals
- **In progress:** Azure AI Apps and Agents Developer Associate (AI-103)

PROJECTS

RAG with Azure AI Search

Objective: Build a retrieval-augmented generation pipeline that grounds LLM answers in source documents.

Tools: Azure AI Search (vector / hybrid retrieval), Azure OpenAI.

Hospitality Roster App

Objective: Build a web app for restaurant rostering with a crew list, a weekly roster grid and close-shift rules that check closing shifts are properly covered.

Tools: Python, Flask.

EMPLOYMENT HISTORY

AI & Software Engineer (Projects)

2026 – Present

Freelance / Independent, Melbourne, VIC, Australia

- Building full-stack Azure AI applications with Python backends, Azure AI Search, Azure OpenAI and LLM orchestration
- Building RAG pipelines on Databricks and Delta Lake, combining structured context with vector indexing
- Prototyping agentic workflows using REST APIs and microservice patterns
- Studying agent building and orchestration with Microsoft Foundry Agent Service as part of AI-103 preparation

Business Manager

Oct 2022 – Jun 2026

Grill'd, Melbourne, VIC, Australia

- Managing real-time operations and resource allocation in a high-volume restaurant
- Analysing peak demand to reduce service delays
- Using automated rostering and inventory software to optimise labour cost and inventory turnover
- Leading and cross-training a team of 15+ staff
- Driving adoption of digital ordering and workforce platforms

Business Manager

Dec 2021 – Oct 2022

Mad Mex Fresh Mexican, Melbourne, VIC, Australia

- Leading store operations in a high-volume restaurant
- Managing scheduling
- Maintaining service standards
- Managing team performance

Systems Engineer

May 2016 – Aug 2017

Infosys

- Delivering and supporting enterprise systems in a global IT services environment
- Collaborating with cross-functional teams on application and system delivery and operational reliability

PERSONAL ATTRIBUTES

- **Leadership** – demonstrated by leading and cross-training teams of 15+ as Business Manager at Grill'd and Mad Mex.
- **Working under pressure** – developed through about four years running high-volume restaurant operations.
- **Problem-solving** – shown by analysing peak demand to reduce service delays and optimising labour cost and inventory with rostering and inventory software.
- **Initiative and continuous learning** – shown by founding Australian Vision AI and earning AZ-900, AI-900 and Databricks Fundamentals while preparing for AI-103.
